*"THE ELEGANCE OF
MODERNITY IN A HOME
IS EXPRESSED AND
ENHANCED BY DESIGN
RADIATORS."*

VOGEL&NOOT is Europe's leading technology partner and offers progress on the highest level, paired with a broad product portfolio, covering radiators, panel heating and chimney systems.

Fitters, planners as well as end customers enjoy our continued developments and complete system solutions with functional or extravagant design. They confirm the long-standing success of VOGEL&NOOT.

ENERGY EFFICIENCY AS CORE PRINCIPAL

As an innovative pioneer VOGEL&NOOT has a leading role in the industry and presents future-based heat supply technologies for convenient thermal systems in combination with sustainable protection of the environment.

EXTRAVAGANT DESIGN VARIETY

The design radiators by VOGEL&NOOT set new standards and upgrade modern rooms with their diverse, distinctive appearance and customised workmanship.

INTEGRATED PRODUCT SELECTION AND HIGH-QUALITY SERVICE

As a complete system supplier for heat supply solutions, VOGEL&NOOT not only offers a diversified selection of different product segments, but it also focuses strongly on customised and competent service in all areas.

PROGRESS ON A GLOBAL LEVEL

COMPETENCE WITH PREFECT DESIGN

EXTENSIVE ASSORTMENT

VOGEL&NOOT unites harmony, trendiness and efficient performance and offers a broad range of different products with future-based design radiators, elegant towel warmers, aesthetic convectors and heating walls as well as energy-efficient panel radiators and modernisation radiators. On the European core markets, VOGEL&NOOT presents itself as full-range supplier.

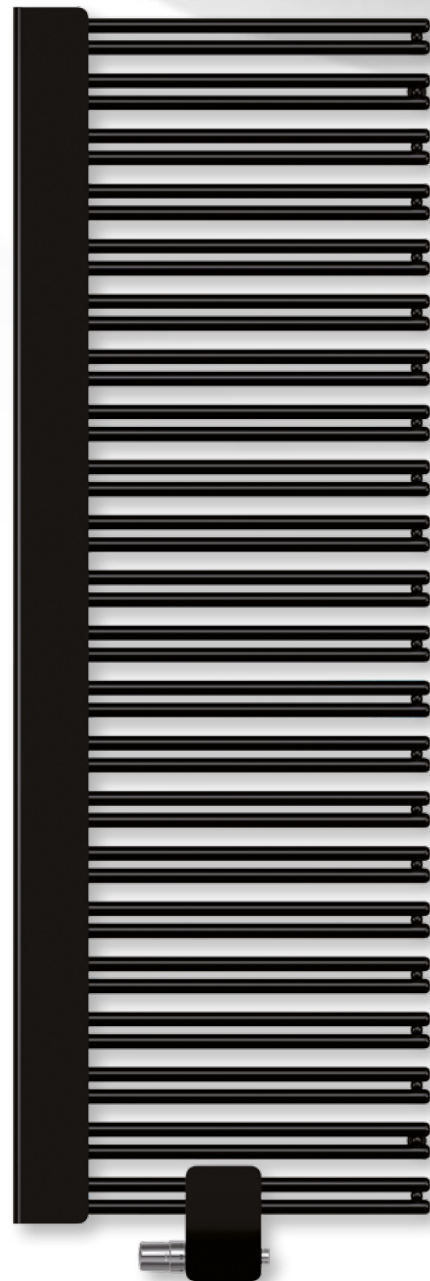

Superior heat distribution technology and diverse design become one and offer first-class solutions. They transform rooms into visually attractive environments.

AN INSTINCT FOR TRENDS

Tastes differ. This is why VOGEL&NOOT engages in a continuous development process, embracing new styles and creating smart heating solutions. Creative design details and good intuition for adding that special something are among the top priorities. For example: The tubes of rounded tube models are not welded together but brayed in a special process, delivering particularly aesthetic and technically impeccable quality. This creates individual and modern heat distributors that enhance every room, either with understatement or striking elements, turning it into one magnificent eye-catcher.

INNOVATIVE THINKING

VOGEL&NOOT operates two own research and development centres in Austria and Germany as well as a design and innovation centre. This ensures the permanent development of VOGEL&NOOT, provides technical improvement and innovative design and is the future-oriented basis of all our work.

FATALA-VM SPA

EYE-CATCHER WITH PREMIUM DESIGN COMPETENCE

The pioneer in the design radiator segment. With its heating tube that is open on one side and due to the purist, sophisticated design, the FATALA-VM SPA model is compelling in every aspect. This radiator with modern central connection technology stands out due to its incredible user-friendliness and generous space for drying and hanging towels and clothes.

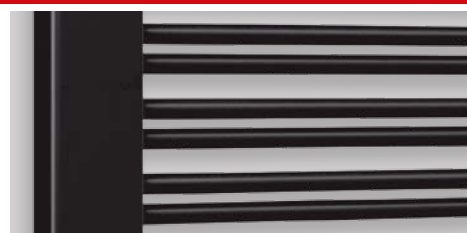

YOUR BENEFITS:

The unique drying device of the FATALA-VM SPA creates an additional first-rate benefit without compromising its elegant design.

NEWA

NEW TREND STANDARDS

Inspired by straightforwardness and youthful esprit, the NEWA model expresses a very special charm. NEWA adds a design statement to every room. The smooth high-gloss finish comes in a great variety of different available colour combinations. In addition, up to three towel holders can be attached that provide optimal drying functions.

YOUR BENEFITS:

The towel holders for the NEWA model are available in open and closed design.

NERO

EXCLUSIVENESS IN PERFECT FORM

A radiator as an eye-catcher? The model NERO makes it possible. The distinctive design has an incomparable character. The chrome-plated frame that is open on one side evokes pure passion for modernity.

YOUR BENEFITS:

The surfaces can be chosen variably and help to create a harmonious, well-balanced room concept that is emphasised by the NERO heat distributor. This way NERO inspires a touch of luxury paired with a great selection of exclusive colour combinations.

LOWA-VM

PLANE FUNCTIONALITY

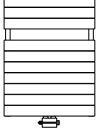

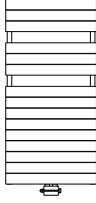

The flat tube design of the LOWA-VM model blends seamlessly into any room and offers modern purism in its most elegant form. The high level of functionality of the central connection radiator provides cosiness and comfort as well as excellent heat distribution.

YOUR BENEFITS:

Due to its clearance, the LOWA-VM model is also an optimal laundry and towel drying device.

KASAI

STRIKING AND UNIQUE

What is unique lies in the eye of the beholder - and it is easy to recognise in the KASAI model. With its playful, one-of-a-kind design and heating tubes offset on both sides, KASAI is captivating and adds a highly modern flair to all rooms. A trendsetter second to none.

YOUR BENEFITS:

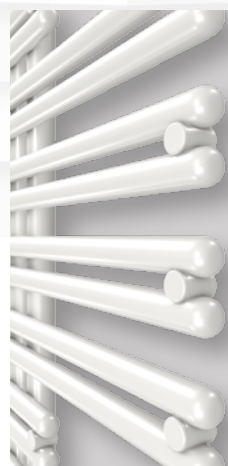

The offset heating tubes facilitate the hanging and drying of textiles and towels.

FATALA

PRECISION THAT IS SPOT-ON

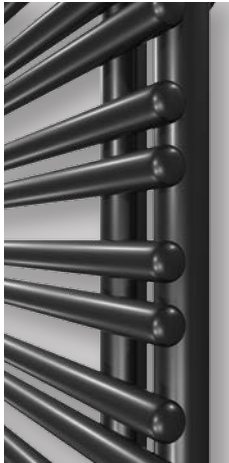

The clearly defined shapes of the FATALA model create structure paired with subtle elegance. Furthermore, FATALA also works as an ideal towel drier and offers a high level of flexibility with connections being possible on both sides. A space-saving variant that is also available as E-model.

YOUR BENEFITS:

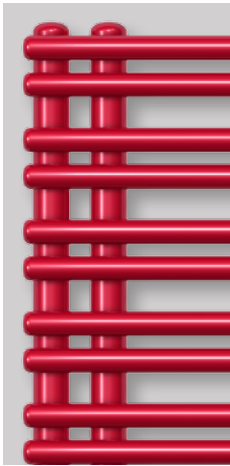

The model that is open on one side dries and warms towels the simplest possible way and is popular for being a compact multi-talent.

VELINO

THE DYNAMIC HIGHLIGHT

Get some dynamic and lively accents into your bathroom. The unique design of the VELINO model is remarkable for its extravagant, wavelike appearance. This design is emphasised by the resemblance to a wardrobe, blurring the boundaries between Furniture and radiator.

YOUR BENEFITS:

This extremely space-saving model with its longitudinally arranged heating tubes makes rooms look bigger.

Radiator:
RAL 9016 Traffic White
Furniture COSIMA

FULDA-VM

ASYMMETRICAL DYNAMICS

The special feature of the FULDA-VM model is obvious at first glance: The asymmetrical form combines an exceptional appearance with a lively curve. A powerfully dynamic creation that is also available as E-model and as standard model.

YOUR BENEFITS: The impressive arrangement of the heating tubes makes the hearts of avant-garde lovers beat faster.

ELECTRIC RADIATORS

MARANOA SPEED AIR

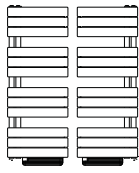

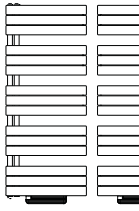

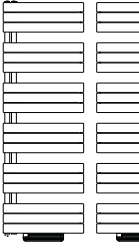

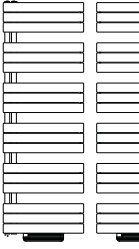

ELECTRIC RADIATOR WITH STYLE

A TRUE EYE-CATCHER

The desired shape is clearly defined: Classic elements are combined with massive elements and create a top-class model. With 1000 Watt output, the MARANOA SPEED AIR model delivers cosy heat and comfort in a matter of minutes. With the intelligent hot air fan and its easily legible digital display, operation can be programmed up to 2 hours in advance (10-minute intervals).

YOUR BENEFITS:

- Hot-air fan for quick comfort
- Exact programming
- Premium design open on one side
- High-quality materials
- Practical heating of textiles and towels
- On/off button integrated in the casing

COMFORT AT THAT.

LEVO-E

ELECTRIC RADIATOR WITH TIMELESS ELEGANCE

SPACE-SAVING YET POWERFUL

The LEVO-E electric model only requires little space to deliver great comfort. In numbers: The clearance between wall and front edge is merely 89mm. This way it also fits ideally into narrower and smaller bathrooms or kitchens. This does not compromise the heating output in any way and delivers short heating times and optimal heat distribution.

MODESTY IN PERFECT FORM

The LEVO is compelling due to its efficient heating performance with dynamic heat distribution, while it does not leave out the aesthetic touch of great design. Short heating times!

YOUR BENEFITS:

- Elegant look
- Compact dimensions - low depth
- High heat output
- Rich selection of colours and designs
- Towel holder available as stylish accessory

TAHITI SPEED AIR

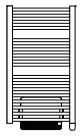

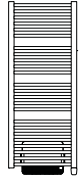

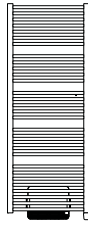

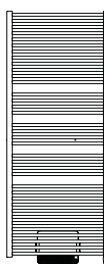

ELECTRIC RADIATOR WITH FLAIR

“SOUTHSEE FEELING WITHIN MINUTES”

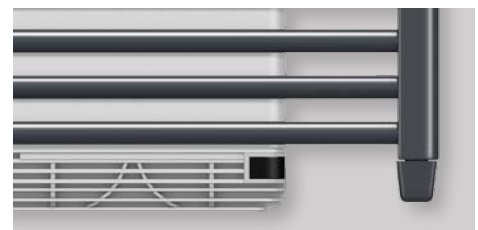

The model TAHITI SPEED AIR brings you a cosy atmosphere within a matter of minutes. Its classic design stands out for its both-sided, closed tubing. In its E-variant it offers rapid heat through the installed hot-air fan. The intuitive digital display provides high flexibility and allows exact programming for up to 2 hours of uninterrupted operation (adjustable in 10-minute intervals).

YOUR BENEFITS:

- Speed air fan with 1000 Watt
- Shortest possible room heating times
- Exactly programmable heating times
- Closed rounded tube design
- Convenient steel-made towel drier

FUNCTIONAL ACCESSORIES

The towel warmers and design radiators by VOGEL&NOOT offer a large number of practical accessories that have been created with style and elegance as well as functional value.

The additional components can also be retrofitted very easily. Create additional shelf space or hangers in no time.

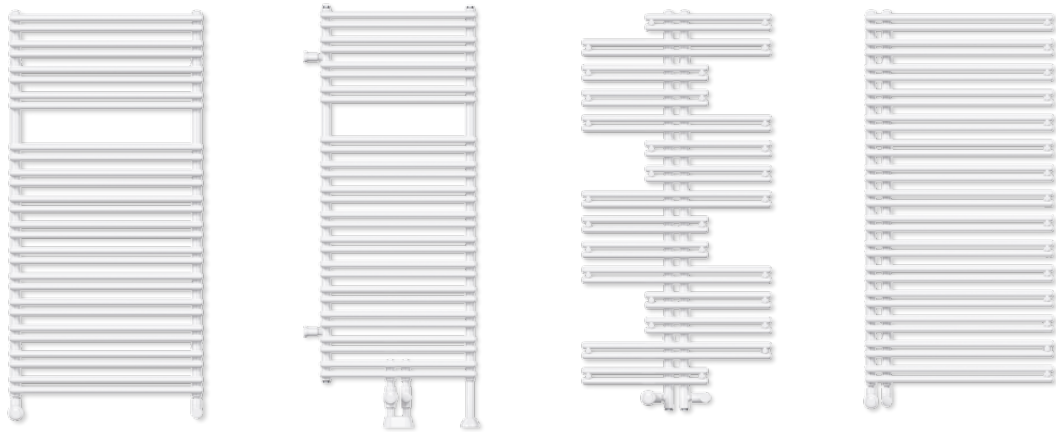

The chrome-plated variants further upgrade the design radiators and are highly compatible with the individual models.

PTC-E- HEATING ELEMENTS

The PTC-E heating elements bridge the gap of the heating free time in an ideal manner and create a cosy atmosphere with short heating times. Depending on the size of the radiator with ratings from 300, 600 to 900 Watt they quickly deliver comfortable heat. The PTC-E heating element can also be retrofitted on almost all design radiators by VOGEL&NOOT.

TEMPERATURE REGULATION FOR PTC-E HEATING ELEMENTS

If a design radiator is operated with a PTC-E heating element, a room thermostat allows the ideal regulation of the room temperature.

INFRARED CONTROL SET

This set includes everything: From a digital room thermostat with infrared transmission to a PTC electric heating element. The infrared transmitter features a clearly structured LCD screen showing room temperature, set temperature, operation mode and BOOST symbol all on one display.

PRODUCT DESCRIPTION AND SCOPE OF SUPPLY

The design radiators by VOGEL&NOOT offer an elegant and stylish alternative to classic radiators and are available in a broad variety of different models, all manufactured in premium quality. The different models of the towel warmer series by VOGEL&NOOT are high-quality design branded products that will blend in perfectly in your bathroom. The unobtrusive design is remarkable for its subtle visual appearance.

Depending on the relevant model, the following designs are available. All products are supplied in ready-to-install protection packaging.

MODELS WITH CLASSIC CONNECTIONS

They come with blind plugs and air-bleeding plugs as well as a wall-mounting set in the relevant colour of the radiator.

MODELS WITH CENTRAL VALVE CONNECTIONS

All models come ready for installation with sealed-in blind plugs and air-bleeding plugs ex works as well as wall-mounting sets in the relevant colour of the radiator, an enclosed valve connection fitting with covering collar in the relevant colour of the radiator. This applies to the models ABUNA-M, DION-VM, BAWA-VM SPA, FATALA-VM SPA, BAWA-VM, BAWA-T-VM, LOWA-VM, FULDA-VM and CAVALLY-VM as well as an integrated connection fitting with thermostat button for NERO. Depending on whether it is a single or double-tube system, the NEWA model also comes with valve connection fittings. Single-tube system: Danfoss valve connection fitting and covering collar (without thermostat button) or double-tube: Poletti design valve set (incl. thermostat button)

DESIGNED AS PARTITION WALL

The ARUN-TWIN model is used as partition wall. The individual room partition makes ARUN-TWIN an attractive interior design element for all living areas. Supplied including blind plugs and air-bleeding plugs as well as wall-mounting and floor-mounting sets in the relevant colour of the radiator.

REPLACEMENT RADIATORS

The models BAWA, BAWA-TWIN, FATALA and FATALA, open on the left side, are supplied as replacement radiators with classic connections with the desired boss spacing, including a wall-mounting set in the relevant colour of the radiator.

MODELS FOR ELECTRIC OPERATION ONLY

The electric radiators of the families DELLA-E, BAWA-E, FULDA-E and FATALA-E as well as the models MARANO SPEED AIR, TAHITI SPEED AIR and LEVO-E have been designed for electric heating only, without any connection to the central heating system. Self-regulation effect: The temperature-based PTC-E heating element regulates the temperature of the heat transporting fluid in the radiator automatically - not adjustable - by modifying the electric resistance (only applies to BAWA-E, FULDA-E and FATALA-E). They are supplied including the wall mounting in the relevant colour of the radiator (exception: LEVO-E).

OPERATING CONDITIONS

For all models a maximum operating temperature of 110 °C has been defined.

MOUNTING SET

At the back of each towel warmer and design radiator there is a wall mounting device that allows the orientation of the radiator in horizontal and vertical direction.

SURFACE TREATMENT

High-quality, environmentally friendly 2-layer varnish according to DIN 55900, ATL primer with electrophoretic varnish, using water-soluble varnish; electrostatic powder coating.

PACKAGING

Support protection, face protection, double-wall cardboard and PE film.

Technical modifications reserved!

CERTIFIED BRANDED PRODUCTS

VOGEL&NOOT is a synonym for premium branded products meeting the highest quality standards in manufacture and operation. The quality and performance data for towel warmers and design radiators by VOGEL&NOOT are subject to constant testing by renowned and independent European institutes. They guarantee the safety with regard to the economically designed heating performance to the highest possible extent as well as excellent product quality.
