

UNITEC.

Unitec is the ideal supplement when replacing an old heating system with a modern, energy-efficient heat generator. As a single-walled flue gas pipe system, **Unitec** can be routed in an existing chimney or in an installation shaft.

Advantage:

Unitec is a simple, safe and multi-purpose flue gas evacuation system for oil or gas powered low-temperature heating systems and condensing boilers, or for heat generators that use solid fuels.

Internal diameter	80 – 600 mm
Material quality (inside)	1.4404 or 1.4571
Wall thickness 80 – 250 mm	0.5 mm
Wall thickness 300 – 350 mm	0.6 mm
Wall thickness 400 – 600 mm	1 mm
Thermal insulation, optional	25 mm
Fuel types	Oil, gas, solid fuels
Operating temperature	160/200 or 600 °C
Quality management system	EN ISO 9001 : 2000
