

**Ventitop** ventilators made of stainless steel provide reliable active protection against flue gas reflux, which can be caused by the force of the wind. The elegant **Wave** chimney covers, made of stainless steel or copper, guarantee a long service life for the chimney and complement the architecture of the building.

## VENTITOP & WAVE.

**Advantage:**

Thanks to **Wave**, rain water or snow are not a problem, and the chimney is reliably protected.

**Ventitop**
